Disturbance Ecology in Central Appalachia
Research Experiences for Undergraduates (REU)
at Eastern Kentucky University

**Highlights**

- Students paired with faculty to conduct research in eastern Kentucky
- Weekly professional training workshops
- Recreational trips throughout Kentucky
- Dates: May 23 – July 29, 2022 (10 weeks)
- Benefits: $6,000 stipend, housing, travel support, food allowance, research supplies

**Example research projects**

- Use camera traps, acoustic detection, and live-trapping to study mammal or bird populations
- Study plant, snake, or bee communities of old-growth and managed forests
- Study the effects of mining disturbance and restoration on insects, fish, amphibians, and water quality
- Work alongside agency professionals to restore wildlife habitat

Application deadline: **Feb 18, 2022**
